

Race to 100!

Work with your child to play this game.
Your child will play this game in Lesson 6.

- Prepare a gameboard like this. You also need two number cubes.

I already have...	The sum of the numbers tossed is...	My new total is...
0		

The image shows two dice and a pencil. One die is a 6-sided die with faces showing 3, 5, and 6. The other die is a 6-sided die with faces showing 3, 5, and 6. A pencil is drawn to the right of the gameboard.

- Players alternate turns. For each turn, toss the number cubes and add the two numbers. Record the sum in the middle column. Add the first two columns together and record that sum in the third column. Copy the "new total" into the first column of the row for the next turn.
- The winner is the first player to reach 100 in the "new total" column.

Race to 100 Recording Sheet

I already have . . .	The sum of the numbers tossed is . . .	My new total is . . .
0		

It took _____ tosses to get to 100.
